The Minnesota Pollution Control Agency (MPCA) recently recognized Ryan Brandt and Al Aspengren from Credit River Township for their performance in wastewater operations during 2009.

The awards were announced March 25 at the 73rd annual Wastewater Operations Conference in Brooklyn Center.

Brandt was honored for wastewater treatment efforts in both the Stonebridge and Territory developments in the township. Aspengren was awarded for his part in wastewater treatment in the Territory development.

Stonebridge and Territory were among 170 Minnesota wastewater treatment facilities recognized by the MPCA.

The winning facilities demonstrated consistent compliance with their wastewater permits, submitted all reports correctly and on time, and employed operators certified by the MPCA.
